7 minutes ago

[www.huffingtonpost.com](#) [interview](#) [healthcare](#) [blockchain](#)

[Value-based care: An interview with Katherine Kuzmeskas, SimplyVital Health - Un](#)

14 minutes ago

"What are the types of new innovations you are trying to build at SimplyVital Health and what problems are they solving that couldn't be solved before?"

We are focused on value-based care which is a growing trend in the USA and also globally. What we mean by value-based care is a care system in which payment or reimbursement is based on outcomes. Our platform aggregates a shared view of the patient and we are using blockchain now in a practical and realistic way: by creating an immutable audit trail of activity in the platform."

# I love Graph Thinking

## I Follow

**Neo4j** @neo4j · 23h

Replying to @NovasTaylor @sbahlavooni @jcdecker71

Have you seen our life science workshop proceedings? Perhaps some useful insights.

[neo4j.com/blog/neo4j-lif...](https://neo4j.com/blog/neo4j-lif...)

# I Found Story on Recent Gathering

The screenshot shows the Neo4j website header with navigation links: PRODUCTS, SOLUTIONS, PARTNERS, CUSTOMERS, LEARN, DEVELOPERS, and a search bar. The main content area features a teal banner with the text 'Neo4j Blog' and 'Neo4j Life Sciences & Healthcare Workshop – Proceedings from Berlin'. Below the banner, there are two article teasers. The first is 'Big Data in Genomics: How Neo4j enables personalized therapies' by Martin Preusse (Knowing, Helmholtz Zentrum Munich), accompanied by a small portrait of Martin Preusse. The second is 'Prioritizing SNPs using the Neo4j Galaxy Interactive Environment' by Thoba Lose (South African National Bioinformatics Institute), accompanied by a small portrait of Thoba Lose. The text of the first article states: 'Biomedical research generates vast amounts of data. New experimental technologies like DNA sequencing, metabolomics and proteomics drive the fast growth of available information and lead to a better understanding of the molecular organization of life.'

# Proceedings from Berlin

(Neo4j Blog)←[:BACK]

By Michael Hunger & Petra Selmer, Neo4j Team | September 29, 2017

Often invisible to the people outside of the field, life science researchers have been quietly embracing **graph databases** instead of the traditional triple and relational stores.

On June 21, we invited a group of life science and healthcare researchers and practitioners to E to share their experiences in a full-day workshop.
